

on one instance

Fig. 1

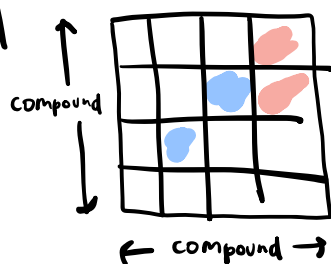

Fig. 2

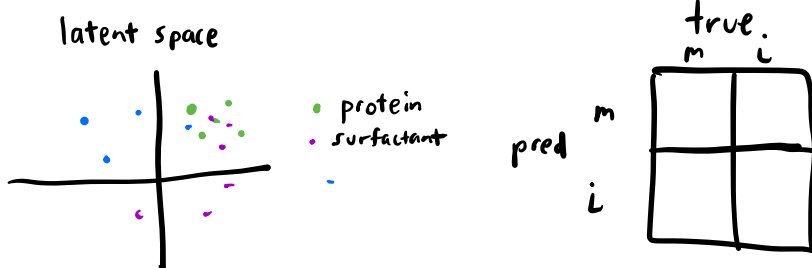

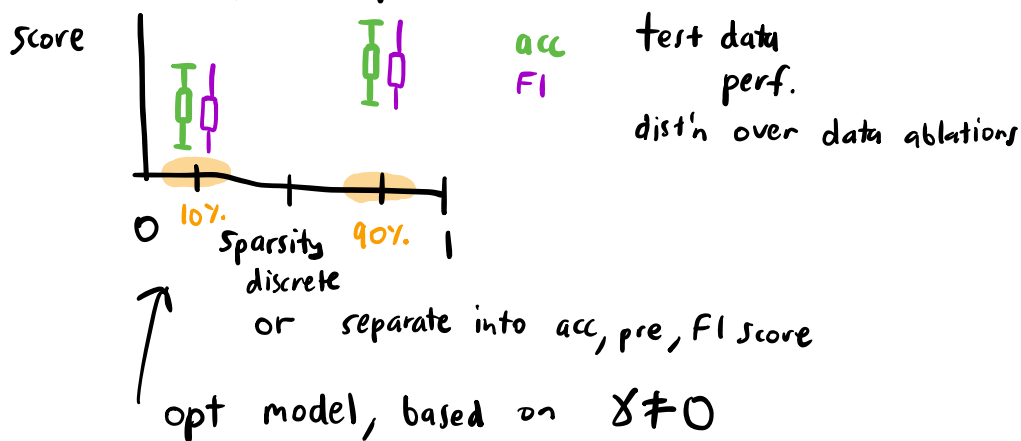

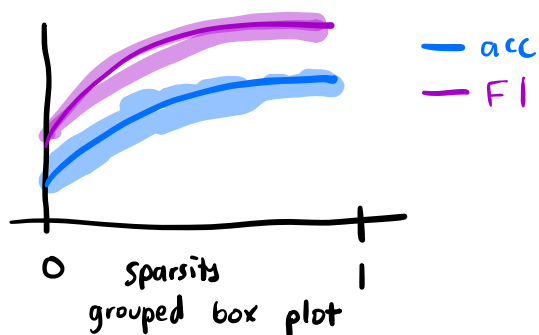

Fig. 3

describe  $\lambda = 0$  in text.

make version of this in SI for vanilla MF and non-optimal features, and for RF baselines, so four of them.

all in one plot, panels a, b, c, d.

eg. graph-reg could be better w/ less data.

stack all in one column.

features help a lot at high sparsity
